COMMAND FIRST™

Gemini introduces an operating system so intuitive it dramatically reduces both the time it takes to train End- Users and the occurrence of user caused false alarms.

Foremost in Family Safety	Space saving, award winning design	Home Automation Center
<ul style="list-style-type: none"> • Single button emergency transmitter • Direct paging to phone, pager or cell when children arrive home from school (Latchkey feature) • Away arming – protect your home when your away. • Home arming – protect the perimeter from intrusion while home. • Chime by zone – know when a door has been opened in your home. • 6 hour battery backup in case of power failure. 	<ul style="list-style-type: none"> • One unit contains the control unit, siren, speaker, keypad and battery backup. • BSIA award for best new product in the intrusion category. • Wireless system, no ugly wires in your home. • Secure digital communication with the central station. 	<ul style="list-style-type: none"> • Leave messages for family members directly on the system. • Control lights or operate up to seven (7) X-10 powerline automation devices from Gemini • 100 Event Log • Full voice response • Available in 2 colors (black or white)

<p>Glass Break Sensor</p> 	<p>Wireless Door/Window Contact</p> 	<p>Wireless Motion Sensor</p> 
<p>The Wireless Glass-Break sensor is quickly becoming an asset in preventing home invasions. It provides 360 ° detection (<i>line of sight</i>) with ranges of up to 20 ft and it can detect different types of breaking glass including plate, tempered, laminated and wired. Because of this the sensor can also distinguish between true and false alarms. This product also features a smart anti-collision algorithm that prevents jamming from multiple signals.</p> <p>Ideal for homes with a large number of windows in one room or in a walk-out basement.. Great Use for Pet Owners.</p>	<p>One of the smallest wireless Door/Window contact in the market. Gemini wireless Door/Window contacts have many features over the old hard wire systems... One very large improvement is that the new systems are <u>very easy to install</u>. Also the new contacts allow for the wind to move the door up to 1/4". This means if a gust of wind hits your front door the alarm won't go off! <u>Less false alarms</u>.</p> <p>Door/Window contacts should cover all possible entrances/exits from the home on the main and basement levels.</p>	<p>These new Wireless Motion sensors are very effective in home security. You can monitor an entire room with just one sensor, and they are completely wireless, which makes them <u>very easy to install</u>. Motion sensors are becoming more and more popular around the home to deter would be criminals because they are very hard to avoid. Now we also feature PET friendly motion sensors that are set to either 40lbs or 80 lbs. One of the definite keys to home security.</p> <p>Wireless motion sensors will detect any unwanted movement in your home.</p>

Home Safety

Installation of the following devices usually qualifies home owners / renters for a discount on their insurance.

<p><i>Gemini Smoke Detector</i></p> 	<p><i>Wireless Heat Detector</i></p> 	<p><i>Flood Detector</i></p> 
<p>The wireless smoke sensor is a newer product in a home security system. Every home is equipped, or should be equipped, with smoke detectors that will sound an alarm if they detect smoke. The benefit of the Gemini smoke detectors is that they are directly connected to TRITON's Central Monitoring Station. Therefore, if there is a fire and you are not home, TRITON will dispatch the fire department for you, helping to protect your valuables and keep sakes. If you are home there will be an alarm to notify you that there is a fire and will give you time to escape while TRITON calls the fire department for you.</p> <p><u>No Home Should Be Without It.</u></p>	<p>If your home operates off central air heating where a natural gas, oil or electric furnace is used, you NEED a wireless heat detector. This device will notify both you and TRITON in the event that your furnace malfunctions and overheats. This device can save you and your loved ones. The wireless heat sensor is beneficial for all homes, but usually recommended to those who travel away from their homes for long periods of time.</p> 	<p>The Flood sensor is a must have for anyone who lives in an area that is prone to high levels of rain or lives close to large bodies of water. This sensor is programmed into the Gemini CPU and will warn you in the event of a flood. This might be when you're sleeping, at work or on vacation. This sensor will give you an early warning that will allow you or someone else you trust to go to your home to save your valuables before they are destroyed.</p> <p>A must for those living on a flood plane or those using a sump pump.</p>

Home Automation

Keyfob

Wrist transmitter

X-10 Home Automation

This little remote attaches to your keys. Use it to arm and disarm your home security system. No more trying to juggle the things in your arms to enter the access code followed by rushing out the door before the alarm times out and the alarm goes off. This remote has up to a 300 foot range so you can arm your system from your car if you like. Furthermore, the Gemini Keyfob offers Code-Secure™. Every time the transmitter sends a signal, it uses a different code known only to its intended receiver.

Finally, a remote for your home.

The miniature waterproof wrist-worn transmitter, designed for personal emergency signaling and other applications where the transmitter needs to be within easy reach at all times. Attractive comfortable ergonomic design, this wrist band features a long life lithium battery and can be worn in the shower or when swimming if need be. It is directly connected to the TRITON Gemini CPU which will send a signal to the TRITON Command Monitoring Center who will then follow the pre designated instructions given by the client.

Ideal for people with short-term or long-term physical challenges that may need attention due to an emergency but who still want the ability to live an independent life.

Built-In Home Automation!!!
The TRITON Gemini can control up to seven X-10 products from the CPU. You can turn lights on and off, control your thermostat, open the garage door and see who is at the front door.

Using the Keyfob with X-10 lamp module you can turn on the porch light before you walk up to the front door.
