

"Protecting today for tomorrows future"

TRITON MEDIC - WATCH

TRITON SECURITY INC.

An additional service exclusive to TRITON is our MEDIC-WATCH personal alarm system that will alert emergency personnel, ambulance, family members or friends if you have a medical emergency.

MEDIC-WATCH does not require the installation of a alarm system. It only requires a minimal initial investment and there is no long-term commitment. Simply pay as you go.

MEDICEYE is a reverse motion sensor added to your security system that will send an emergency signal to the TRITON Command Centre if there is no motion detected in your home within a pre-determined period of time.

WIRELESS MONITORING

To better improve your security needs Triton Security specializes in dual monitoring. This means with every security system installed Triton Security will provide emergency monitoring through telephone line and wireless long-range radio reporting.

Providing long-range radio included into Triton packages will ensure multiple communication in the event the telephone is disabled. Clients may also be monitored with out telephone lines. Call for more details...
